Experience the Power of Eggplant Test Today
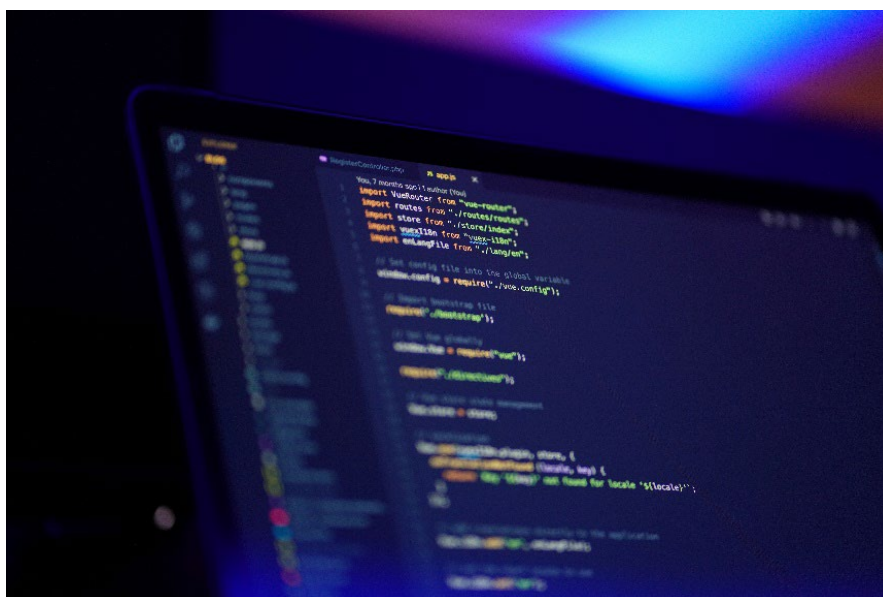

Guided Pilot Program

Comprehensive Testing with Eggplant Test

Eggplant Test is a digital automation tool that provides a complete solution for testing the full digital experience across a variety of platforms and technologies.

Keysight is now offering organizations that are new to Eggplant, a 3-month Guided Pilot Program to experience the benefits of its advanced automation capabilities and assess how they can improve their testing process.
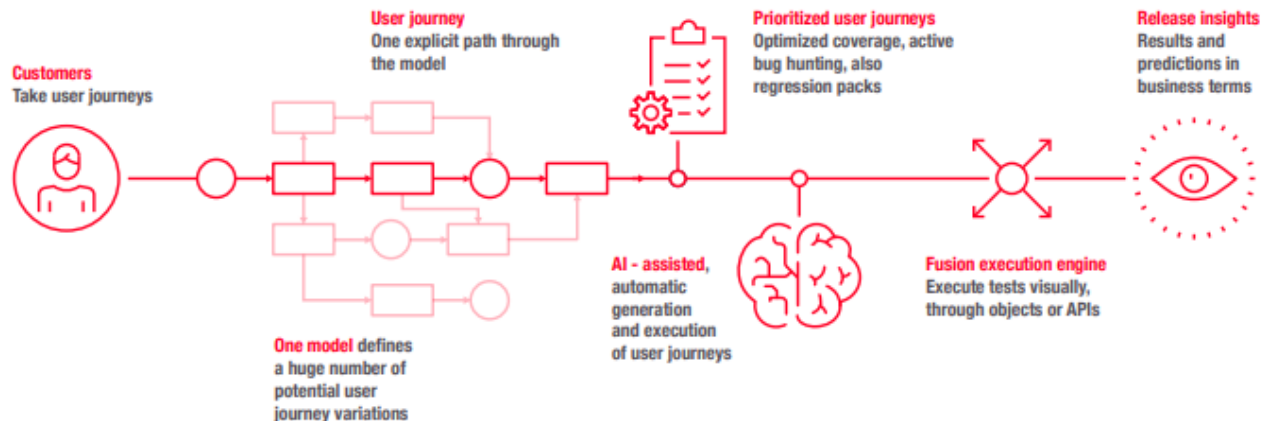

- ✓ A low-risk way to see how test automation can help achieve your digital goals.

- ✓ Includes guidance and support from Eggplant, allowing you to fully evaluate the platform and its capabilities, and determine how it fits into your testing strategy

- ✓ See for yourself the impact that Eggplant Test can have on your QA team, in increasing productivity, improving testing coverage, and reducing costs.

We'll provide the software and the expertise so you can start building and deploying model-based and exploratory testing for your application. Through this pilot, you will discover the full power and capabilities of AI-driven test automation and the measurable impact they can have on your software quality and release velocity.

KEYSIGHT

Benefits of Eggplant Test

Eggplant's intelligent, AI-driven automation solution helps organizations optimize the digital experience they deliver by providing actionable insights to improve performance and drive positive business outcomes.

Key benefits

- **Obtain actionable intelligence to optimize the digital experience you deliver**

  Test smarter and faster with intelligent, AI-driven automation to optimize performance in line with user expectations, keep pace with DevOps, and drive positive business outcomes.

- **Future-proof your testing by combining automated exploratory testing and fixed regression packs**

  Dramatically simplify testing scenarios with Intelligent Test Scheduling, which combines these traditionally separate disciplines. Ensure future tests optimize available resources.

- **Test any technology at every layer in any way**

  Eggplant's platform-agnostic approach can test any device, OS, or technology at any layer.

- **Empower domain experts to become automation engineers**

  Support digital transformation initiatives via a low-code/no-code platform that can be utilized by domain experts, building analysts, and full-stack developers.
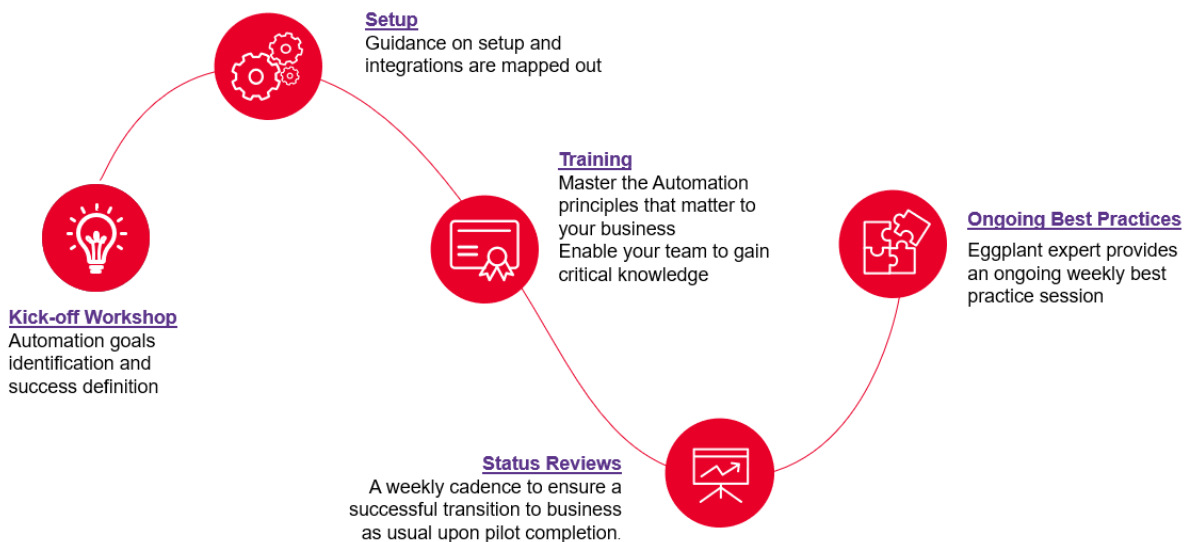

What's included in the Guided Pilot Program?

Eggplant is now offering new customers a 3-month Guided Pilot Program that allows you to experience the benefits of Eggplant Test before committing to a long-term contract. This is designed to reduce risk and help you make an informed decision on whether Eggplant Test is the right solution for your organization.

Guided Pilot Program

The Guided Pilot Program offered by Eggplant starts with a kick-off workshop where Eggplant's team will work with your organization to understand your specific problems and testing needs. This allows us to tailor the setup and implementation of the platform to your unique requirements. After the kick-off workshop, Eggplant will set up the platform and provide training for your team to ensure they can effectively use the tool.

Over the 3 months, we will have a weekly cadence of status reviews with your organization to ensure you are on track, making progress, and share ongoing best practices to improve your testing. These reviews will allow you to share feedback and ask any questions, and for Eggplant to provide guidance and support.

Setup
Guidance on setup and integrations are mapped out

Training
Master the Automation principles that matter to your business
Enable your team to gain critical knowledge

Ongoing Best Practices
Eggplant expert provides an ongoing weekly best practice session

Kick-off Workshop
Automation goals identification and success definition

Status Reviews
A weekly cadence to ensure a successful transition to business as usual upon pilot completion.
